

## Cross Cultural Management in Australia Study Abroad Program *Sample Itinerary\**

Avoid the winter and explore the summer in Australia. This study abroad program explores human cultural and environment relations from a sustainable development perspective. Sustainability is a defining global issue and, over the past several decades, Australia has made critical advances in green policies, economics and lifestyle behaviors, as well as in indigenous relations and in recognizing the nation as a multi-cultural society, to become one of the most progressive countries in the world. During this study abroad trip focus on four distinctly different communities: Marine life of the Great Barrier Reef, Aboriginal culture in the Outback, eco-tourism development of the Sunshine Coast, and the urban metropolises of Sydney.
